Thin, lightweight Hardboard is renowned for its strength and durability, and is an exciting, versatile material that can be used to create stylish interiors - from feature walls and ceilings to fine furniture.

Hardboard can be curved, shaped, laminated, painted, or lacquered to suit any style.

Hardboard is well known for strength, ease-of-use and for the superior paint finish achievable on its high density surface.

As well as familiar standard Hardboard and Pegboard, today's Hardboard range includes embossed styles with textured surfaces to suit every decor style and every room.

These surfaces, combined with bold, striking colours, form a simple yet exciting

decorative feature and an infinitely variable one.

Or you can use layered effects for stunning results with

Leather board.

You choose

the look. And, if you

change your decor, just

repaint the Hardboard for a complete about-face.
